[Home](#) > Sisal Presents an Award to the Istituto Von Neumann

03/30/2008 - 06:51

Finalist at the fourth edition of the international *Global Junior Challenge* [1] competition and winner of the President of the Republic Award [2] reserved for Italian schools, the *A Robot to Study – A Robot to Play* [3] Project, designed by the Istituto Superiore per l'Informatica Von Neumann [4], also received the Special Sisal Prize on April 2nd. This is valuable recognition to a team that is preparing for two new challenges: the *RomeCup2008* in July and the *RobCup2008* in China.

With its project the Istituto Von Neumann proves how robotics [5] can be successfully integrated in school programmes not only to learn how to design and program robots, but also as a method for teaching reasoning and experimentation. Sisal, which is particularly attentive to all that happens in the gaming world, has presented an award to the work of a school that moulds creativity, fun and innovation.
