"Maths in [Wonderl@nd](#) ^[1]" is an eTwinning project developed by two groups of 13-15 years old students from Italy and Romania. The working language is English. They have planned the project mainly during the Global Junior Challenge finals in Rome, in 2009, where teachers and some of the Italian students were present. They want to show that Maths can be more than a class in the timetable, it can be a world of imagination and creativity, populated by interesting and peculiar things, just like Lewis Carroll's book "Alice in Wonderland" is.
