Students in collaboration for sustainable use and valuation of the local cultural heritage and the natural environment

Nome dell'ente che lo ha realizzato /ORGANIZATION/INSTITUTE PRESENTING THE PROJECT: *: Kuressaare G

Regione/Region: Saaremaa

Paese/ Country: Estonia

Città/ City: Kuressaare

Descrizione del progetto/Describe the project : Project-partners (schools from Greenland, Faroe Islands, and Estonia) share a similar geographical situation (island - with natural and cultural heritage as a destination), different historical background with similar challenges for their citizens (how to keep the cultural and environmental heritage, development priorities- citizens participation in democratic decisions). The project goal is to make pupils interested to use their knowledge to raise their own consciousness about the contents of the project, to be gathered with the local community and furthermore with other communities, the natural and cultural richness and diversity of the area. During our first project-meeting in Estonia we participated in a national Cleanup Day. In cooperation with local authorities we organized waste collection activities: clean up surroundings for international students. As an initiative we made several waste collection trips in parallel to prepare those activities, how to use ICT during mass activities together with local community. After our first meeting all partners organized activities in their local community which are connected with sustainable development and participation in democratic decisions. During project-meetings we learned how to stand up against the global trash problem, organized a sorting action and learned a lot about recycling possibilities. The Greenlandic school organizes in September a cleanup day in their local community - as a good example of local initiative. The project shows possibilities how these topics can be implemented in our project, involve students and parents, how connect project-based learning with the good. We hope that the students became aware of their own responsibility and good for their local communities. More about our project...
